I. Basic Information

Year	2026	Semester	2학기		Class Number	0282
Course Title	비즈니스를 위한 생성형 AI			Class Type	PtBL	
Class Time	목)15:00~18:00		Classroom	강의동206		
AI Usage Policy for This Course	(√) Active Use () Conditional Use () Prohibited					
	1. Active Use: The use of AI is actively encouraged to support learning. However, students must be aware of the precautions for use and must submit a [Generative AI Usage Statement.] 2. Conditional Use: Limited use of AI is permitted for brainstorming, grammar correction, etc., during learning and assignments. However, the final output must be produced by the student. Students must submit a [Generative AI Usage Statement.] 3. Prohibited: The use of AI is entirely prohibited throughout learning and assignments in this course.

IV. Course Description

	(√) ()							
Grading Method	Absolute Grading							
Overview	This course equips participants to apply generative AI and LLMs in business, covering LLM architecture, prompt engineering, retrieval-augmented generation (RAG), agentic systems, fine-tuning, and AI ethics/governance.							
Objectives	By the end, learners will be able to: articulate LLM fundamentals and business applications; engineer effective prompts; integrate RAG for contextual responses; design agentic workflows; fine-tune models; address ethics and governance; and discuss generative AI's transformative potential.							
Prerequisites	Python							
Type of Lecture	총15주차		01주차, 02주차, 03주차, 04주차, 05주차, 06주차, 07주차, 08주차, 09주차, 10주차, 11주차, 12주차, 13주차, 14주차, 15주차					
Teaching Methods	()A project provided by the instructor [Designated by a company (Institution) (√)The instructor provides the area of the subject, within which the learner is fre ()Learners fully choose topics without instructor’s involvement							
Teaching Methods	(√)Program·System development (√)Paper (√)A Project Plan ()Others							
Evaluation	Mid-term Exam	Final Exam	Quiz	Assignment	Attendance	Participation	Others	Total
	20	30	0	20	10	20	0	100
Remarks	Team project: Each team can choose a project topic among research, service or product development, and/or case study related to generative AI. Up to four students will form a team, and the team leaders will earn extra credits as participation score. Paper discussion: there well 9 paper discussion session, students who lead paper discussion earn participation score. Assignment: Midterm and Final reports will be scored as assignment score.							

VI. Course Evaluation

Last Course Evaluation Score	/ - / -	Average of Similar Courses Group	/ - / -
Improvement for this Semester			

※ Average of Similar Courses Group : This is the average course evaluation score among all courses within a course group. Course groups are determined based on class sizes, grade and course classification.

VII. Materials and References

Materials	Generative AI for Business: Frameworks, Techniques, and Governance. Wei Chen and Liwei Chen. GenAI Flows Publishing. 2025. ISBN 979-8-9997161-0-1. https://www.genai4all.org/ (eBook is available: Kindle and VitalSource)

VIII. Weekly Plan

※ For Captone Design, Weekly Plan might be omitted.

1주차	Objectives	Course Introduction
	Description	Course Introduction and team building
	Teaching Methods	Lecture, Team Activity
	Assignment	Reading: Ch1, Paper 1
2주차	Objectives	Architecture
	Description	Study the architecture of generative AI, exercise basic use of generative AI in a lab session, and discuss about Paper 1 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch2, Paper 2
3주차	Objectives	Prompt Engineering I
	Description	Study and exercise the prompt engineering, and discuss about Paper 2 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch3, Paper 3
4주차	Objectives	No class (Chuseok)
	Description	No class (Chuseok)
	Teaching Methods	
	Assignment	
5주차	Objectives	Prompt Engineering II
	Description	Study and exercise the advanced topics of prompt engineering, and discuss about Paper 3 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch4, Paper 3

VIII. Weekly Plan

※ For Captone Design, Weekly Plan might be omitted.

6주차	Objectives	Embeddings and RAG (retrieval augmented generation)
	Description	Study and exercise the embeddings and RAG, and discuss about Paper 3 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch5, Paper 4
7주차	Objectives	RAG II
	Description	Study and exercise the advanced topics of RAG, and discuss about Paper 4 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch6
8주차	Objectives	Midterm
	Description	Team Project Presentation
	Teaching Methods	
	Assignment	
9주차	Objectives	Agentic Systems I & Project Update
	Description	Study and exercise the agentic systems, and students will present the progress of their team projects
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch7, Paper 5
10주차	Objectives	Agentic Systems II
	Description	Study and exercise the advanced topics of agentic systems, and discuss about Paper 5 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch8, Paper 6

VIII. Weekly Plan

※ For Captone Design, Weekly Plan might be omitted.

11주차	Objectives	Fine-tuning & Challenges
	Description	Study and exercise fine-tuning of LLMs, and discuss about Paper 6 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch9, Paper 7
12주차	Objectives	Engineering & Operations
	Description	Study the engineering and operations of generative AI, and discuss about Paper 7 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch10, Paper 8
13주차	Objectives	Project Updates & Feedback
	Description	Students will present the progress of their team project, give feedback to each other, and discuss about Paper 8 led by students
	Teaching Methods	Team activity, Paper Discussion
	Assignment	Reading: Ch11, Paper 9
14주차	Objectives	Governance & Opportunities
	Description	Study and the governance and opportunities of generative AI, and discuss about Paper 9 led by students
	Teaching Methods	Lecture, Lab Session, Paper Discussion
	Assignment	Reading: Ch12
15주차	Objectives	Final
	Description	Team project Final Presentation
	Teaching Methods	
	Assignment	

VIII. Weekly Plan

※ For Captone Design, Weekly Plan might be omitted.

16주차	Objectives	Make-up Class
	Description	Special Topic: Latest topics in Generative AI Research
	Teaching Methods	Lecture
	Assignment	

IX. Regarding Disabled Students

「Rules Pertaining to Disabled Student Support」 Disabled students are entitled to special conditions or assistance when taking the class, receiving materials, completing homework assignments and writing exams. Students should consult the professor, Academic Affairs Team or Student Affairs Team regarding particular needs prior to registering for the class.

IX. Precautions for Using Generative AI

Generative AI may reflect social and cultural biases embedded in its training data and can produce inaccurate or contextually inappropriate results due to "hallucinations" (factual inaccuracies). Therefore, students must critically review and verify all AI-generated content using reliable sources. If a student fails to recognize these limitations and submits work containing AI-generated errors, the student bears full responsibility for any resulting academic penalties.

Generative AI Usage Statement

1) Basic Information

Course Information	
Student Information	
Tool Used	
Date of Use	

2) Purpose and Scope of Use (check or describe applicable items)

☐	Idea brainstorming and outline drafting
☐	Sentence correction and grammar checking
☐	Data analysis or draft code generation
☐	Requesting summaries or explanations of specific concepts
☐	Other (please specify: _____)
※ Use of generative AI beyond the scope permitted in this course may constitute a breach of academic integrity.	

Main Prompts (Questions)	
Personal Contribution and Revisions	

3) Self-Check and Pledge

☐	I personally verified the factual accuracy of the information generated by AI.
☐	I did not copy the AI's output as-is, but restructured it in my own words.
☐	I used AI only as an auxiliary tool, and derived the key content myself.
☐	I have transparently disclosed my use of generative AI, and understand that failure to do so may be regarded as academic dishonesty.
☐	I recognize that generative AI may produce biased or inaccurate information, and I have critically reviewed its output accordingly.

I confirm that the above statements are true, and that if found to be false, I may face grade penalties or disciplinary actions.
